

ViCloud VMT 3D

PUBLIC SPACES / WORKSPACES

Description

A light weight and uncomplicated acoustic solution, ViCloud VMT 3D hangs in the ceiling suspended in the air to support and manage sound where there is a lot of background noise, conversation and disruptive sounds, such as restaurants, open plan offices, convention centers and atriums.

Available in a range of shapes and colors, and for customization, ViCloud VMT 3D are ready to be installed without the need of professional assistance and in lots of different of spaces.

Being a suspended acoustic element, it presents twice the area of absorption material than a common acoustic panel, making it a very effective solution for high ceilings venues. The minimum installation height of the clouds is 500mm and the maximum is 1180mm.
