

RK

Everything in order and clearly visible for flexible and functional storage: this is the result of the design and construction of the **RK** series of polypropylene boxes and their dedicated shelving system.

Available in eleven different sizes to meet every need, the drawers are ideal for spare parts dealers on account of their resistance to oils and their internal divisibility.

WALLS

Made of top quality polypropylene, the RK boxes have walls strengthened with special ribbing to protect against shocks.

LABELS

HANDLES

Fitted with label holders available in various sizes proportionate to the size of the boxes to which they are applied.

A special handle can be supplied on request for easy lifting and transportation of the RK boxes.

BOTTOMS

DIVIDERS

smooth bottom

Made of transparent polystyrene, the dividers allow the inside of the boxes to be partitioned into several compartments.
