

VicTiles 3D Porto PS WS

VicTiles 3D Porto are decorative acoustic panels designed to reduce reverberation and improve sound clarity in interior spaces such as offices, hospitality environments and residential areas. Combining effective sound absorption with a detailed 3D surface, they transform walls into functional design elements.

Inspired by traditional Portuguese azulejo tilework seen in locations like Rua de Santa Catarina, the design reflects the cultural heritage of Porto. Its geometric patterns reinterpret classic mosaic compositions, creating a balance between historical identity and contemporary architecture.
